

TETHYR™

ONE CAP. THREE FUNCTIONS. ZERO COMPROMISES.

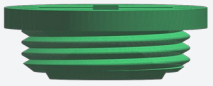

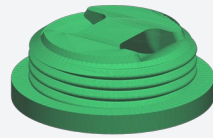

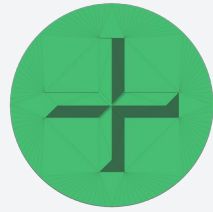

The world's first **3-in-1 conduit cap** — it seals out debris, anchors your pull string or pull tape, and puts a precision field layout mark right at the conduit stub-up.

Available as a **Thread Cap** for threaded fittings or a **Slip Cap** for PVC, RMC, or EMT conduit.

FLT75 3/4" Thread Cap shown

3-IN-1 FUNCTIONS	10 TRADE SIZES	3/4"-6" SIZE RANGE	2 CONFIGURATIONS
----------------------------	--------------------------	------------------------------	----------------------------

THREE FUNCTIONS, ONE CAP

		
<p>01 DEBRIS SEAL</p> <p>Tight, end-protecting fit blocks concrete, mud, and construction dust from rough-in through pull day. Overhanging top lip shields fitting threads and conduit ends.</p>	<p>02 PULL STRING ANCHOR</p> <p>An internal cavity molded into every cap gives you a dedicated tie-off for pull string or pull tape. Secure, consistent, and always there when you need it — no more improvising.</p>	<p>03 FIELD LAYOUT MARK</p> <p>The recessed cross slot is more than tool engagement — it gives you a precise center point for tape measure, string line, or survey layout right from the conduit stub-up.</p>

TWO CONFIGURATIONS — ONE FOR EVERY JOB

<p>THREAD CAP FLT</p> <p>Threads into standard NPT threaded conduit fittings. 3/4" through 6". Thread Cap sizes match standard NPT specs (14 TPI down to 8 TPI).</p>	<p>SLIP CAP FLS</p> <p>Push-fits into the bare end of PVC, RMC, or EMT conduit. 3/4" through 6" (PVC/RMC); 3/4" through 4" (EMT). Sizes match standard conduit ID.</p>
